## INTRODUCTION

Jureance is a non-custodial storage and trading protocol built on Binance Smart Chain. The protocol enables network participants to effortlessly store and trade their documents and digital assets by modifying them into Extensible Non-Fungible Cryptographic Tokens called "INDENTURES",

## ABOUT JUREANCE

Non-Fungible Tokens (NFTs) has grown substantially in the last few years. As most of the NFT's activities are centred on artworks and gaming features, no attention is being given to the storage of documents and digital assets (which is also a very important innovation of NFT) .

Jureance aims to alleviate this problems by providing a storage and trading protocol for documents and digital assets on a highly scalable and decentralized platform. With focus on approachability, ease of use and low fees.

Jureance will democratize access to WEB3 and its products by providing a Permissionless Decentralized Application (DApp) where network participants can:

- 1) Store documents and digital assets on multiple Blockchains by modifying them into Extensible Non-Fungible Cryptographic Tokens called "INDENTURES"

- 2) Trade indentures with ease and low fees on the decentralized application
- 3) Message other network participants across the decentralized application
- 4) Bring forth, and then vote on, proposals that would affect key parameters such as security and development of the protocol.
- 5) Stake their tokens to contribute to security and efficiency of the protocol and they will be rewarded with an Annual Percentage Yield (APY) of 20%

## **FEATURES OF JUREANCE DECENTRALIZED APPLICATION**

- Documenting Board
- Marketplace Board
- Governance Board
- Community Board
- Staking Board

### **Documenting Board**

This feature will enable network participants to store their documents and digital assets on multiple blockchains by modifying them into Extensible Non-Fungible Cryptographic Tokens (INDENTURES).

### **Marketplace Board**

The marketplace feature will enable Jureance Network Participants to trade indentures effortlessly using Jureance Native Utility Token (JURE).

The Jureance marketplace layout will focus on decentralization, approachability, ease of use and low fees.

### **Governance Board**

Jureance protocol will be centered on decentralization and will be governed by a Decentralized Autonomous Organization (DAO) containing Jureance Token holders. Hence, Jureance decentralized application will have a Governance Board where network participants can bring forth, then vote on parameters that would steer the direction of the protocol.

**Key Parameters That Could Be Voted On By Jureance Token Holders Include :**

- ✓ Improvement to the protocol such as changes to governance processes and smart contracts
- ✓ Revenue Model of Jureance protocol
- ✓ Rating of indentures for sale that meet the requirements of the protocol

### **Community Board**

This feature provides democratized access to other network participants across Jureance Protocol by providing a permissionless messaging feature on the Decentralized application.

### **Staking Board**

This feature will enable "ALL" Jureance Token Holders to stake their tokens and get rewarded with an Annual Percentage Yield (APY) of 20%. Anti-whale measures will be implemented to ensure a fair distribution of the rewards. This means you will not be able to stake more than 70,000 tokens

## VISION OF JUREANCE DECENTRALIZED APPLICATION

### JUREANCE UTILITY TOKEN

The JUREANCE token (JURE) is a native asset on Binance Smart Chain (BSC). JURE will be used as remittance among network participants on Jureance and it will also oversee the entire ecosystem including future iterations of the protocol.

The protocol would fully be a Decentralized Autonomous Organization (DAO). As part of the DAO, holders of JURE will be able to initiate proposals and vote on issues that would enhance the improvement of the protocol. Jureance Token Holders will also be able to stake their tokens on the staking board to contribute to the security and efficiency of the protocol and they will be rewarded with an Annual Percentage Yield (APY) of 20%. A total supply of 100,000,000 JURE would be distributed accordingly, as the aim of the token distribution is to ensure healthy engagement of the protocol.

## JUREANCE TOKEN

Jureance Token is used for governance of the protocol, method of remittance and provides access to all of our features

  
**100M**  
Total supply

  
**20%**  
APY

  
**BSC**  
Network

## TOKEN AND FEES

Stake our native token to receive rewards

Use token to initiate proposals and vote on parameters that would improve the protocol.

To continually improve the protocol, there's a 4% fee when buying an indenture.

Fee Breakdown: 1% development, 1% marketing, 1% team, 1% ecosystem

## JUREANCE TOKENOMICS

Feature	Price	Num of tokens	Percentage	Vesting schedule
Seedsale	0.03	2,000,000	2%	10% unlocked at TGE. Then linear vesting over 10 months
Public sale	0.09	5,000,000	5%	20% unlocked at TGE. Then linear vesting over 4 months
Liquidity		5,000,000	5%	
Marketing		10,000,000	10%	linear vesting over 24 months
Team		10,000,000	10%	24 months Cliff. Then linear vesting over 24 months
Development		10,000,000	10%	linear vesting over 36 months
Treasury & reserves		17,000,000	17%	5 months Cliff. Then linear vesting over 30 months
Advisors		5,000,000	5%	2 months Cliff. Then linear vesting over 20 months
Staking & rewards & Lp incentives		34,000,000	34%	1 month Cliff. Then linear vesting over 60 months
Airdrop		1,000,000	1%	linear vesting over 5 months

**market cap at TGE - \$108,000**

## DEVELOPMENT ROADMAP

### Q1 2022

- . Formation of team
- . Launch of Jureance Initial Website
- . Establishment of social media presence
- . Release of white paper and pitch deck
- . Community building
- . Seedsale
- . Airdrop
- . Minting of Testnet Tokens
- . Internal security audit
- . MVP : Intro
- . Minting of mainnet tokens
- . External security audit
- . Public Sale : Jureance Token Launch
- . Listing on exchanges commence
- . MVP : Alpha Version Release

### Q2 2022

- . Integration with Tspace to extend cross-chain functionality and facilitate the growth of both projects
- . Gathering feedback, fixing bugs and fine tuning of the protocol
- . More External Security Audits
- . Beta Version Release: Users start making use of Jureance Decentralized Application
- . Support for BSC Network
- . Addition of staking board on Jureance D'App
- . Support for more EVM based contracts
- . More CEXs and DEXs listing
- . Community Expansion: Contests , community events and quizzes

### Q3 2022

- . Extension of supported protocols and contracts
- . Support for non-EVM based networks
- . Open repository for developers
- . Exploration of alternate revenue streams for the protocol
- . Launch of Jureance acceleration program

## JUREANCE COMPETITIVE ADVANTAGE

	Jureance	competitors
WEB3.0 Integration	✓	✗
DAO Governance	✓	✗
User - Incentives	✓	✗
Multilingual Support	✓	✗
Multi Chain Support	✓	✗
Staking Board	✓	✗
Inartistic support	✓	✗
non-EVM based contract support	✓	✗

## FOUNDERS

Anthony is a true code enthusiast and cyber security professional. He has worked with few crypto projects and is now educating coders more on Bash, C+ , python and JavaScript

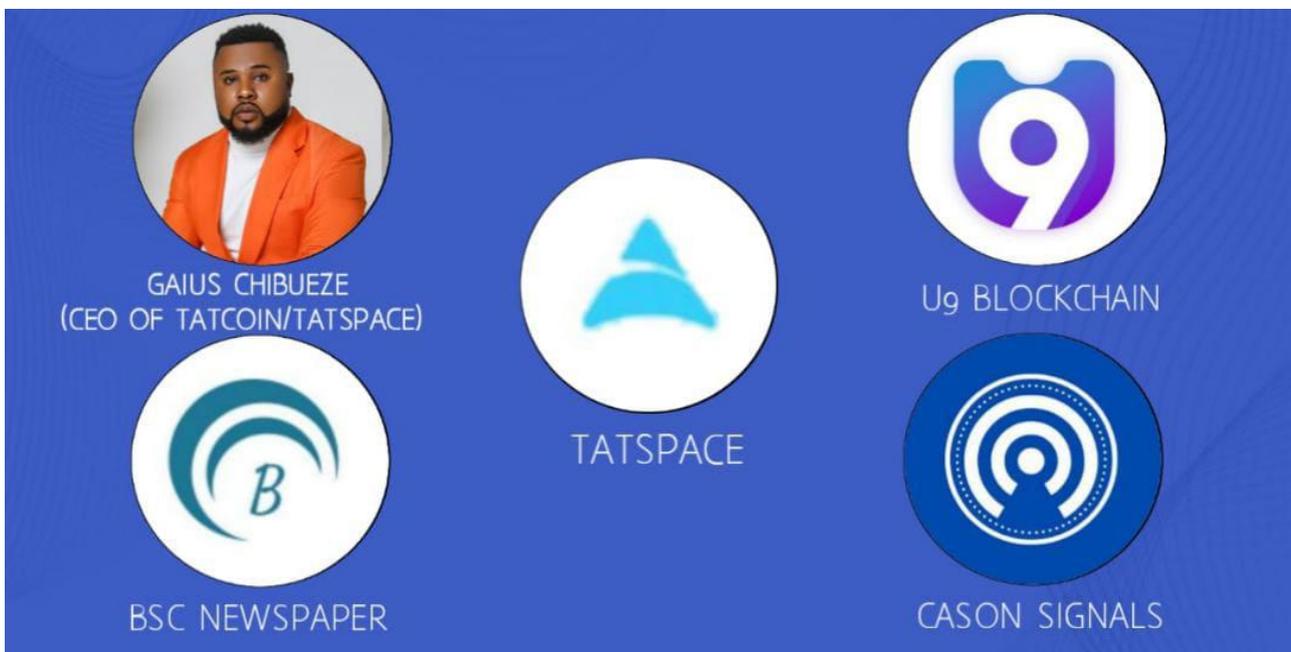

**ANTHONY NNANNA**

Chinedum is a long-term experienced crypto trader. He founded a big African Crypto Hub and he has also helped scale multiple crypto projects and communities with business development and marketing

**CHINEDUM OKONKWO**

## PARTNERS

GAIUS CHIBUEZE  
(CEO OF TATCOIN/TATSPACE)

Ug BLOCKCHAIN

TATSPACE

BSC NEWSPAPER

CASON SIGNALS

## MULTILINGUAL SUPPORT

Jureance Founding Team aims at creating a world-class decentralized application with a great ease of use. To achieve this, our initial release would be in at least twenty-five international languages.

Jureance Multilingual Support can be voted upon by the DAO. So, many other languages will be added overtime.

## RISKS

### **Strength Of Architectural Technology:**

Some decentralized applications are poorly engineered by capable developers because they tend to use the simplest approach to get the system up and running. This might mitigate cost at the beginning but as traffic grows, the system would not be able to handle the increasing load.

The groundwork of Jureance is engineered with speed, scalability, efficiency, privacy and security as a prime concern.

### **Smart Contract Risks:**

Jureance Protocol will be interacting with a lot of smart contracts, all of which imposes risks.

To that effect, Jureance will be continuously pursue security audits for the protocol to spot risks and eliminate them completely.
